

Bowker Book Analysis System

Powerful Collection Assessment for Academic Libraries

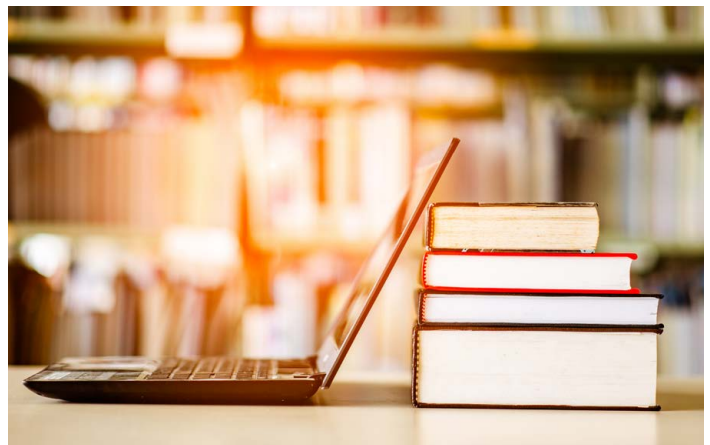

Bowker Book Analysis System™ (BBAS) is a self-service collection analysis and management tool that helps librarians make precise and consistent selection and deselection decisions. Its customized reports compare library holdings against the *Resources for College Libraries* (RCL) core bibliography developed by Choice/ACRL subject specialists, instantly identifying gaps and overlaps in collections.

BBAS DELIVERS

- **Customized Comparisons:** Upload your entire holdings or run a subject by subject analysis against the RCL vetted monograph titles, using the initial match overview or subclassification match options to build a customized list and identify collection strengths and weaknesses.
- **Integrated Metadata:** Access the RCL database detailed item record which provides bibliographic information including retail price, CHOICE reviews and Outstanding Academic Titles data, title previews, awards, and more, including visual discovery from Syndetics Unbound.
- **Data Cleansing:** Improve your collection data while you improve your collection holdings. BBAS provides value-added files including invalid ISBNs, new ISBN conversion, and possible collection duplicates across formats or editions.
- **Ease of Use:** Load your holdings in MARC or CSV and quickly download the data for further analysis, reporting, distribution, and incorporation into your ILS.

ADD QUALITATIVE DATA TO COLLECTION ASSESSMENT

BBAS is the only library assessment tool that employs the authoritative, peer-reviewed RCL core bibliography, enabling libraries to tap the experts at CHOICE/ACRL to build robust, useful collections for faculty and students. For libraries facing space, budget, and staff constraints, BBAS is a cost-effective tool for benchmarking, weeding, administrative reports, accreditation, strategic planning, and more.

“As a smaller institution, RCL and BBAS have supported us tremendously with collection management and faculty partnerships. With limited staff, BBAS helped save on time and resources and is a regular piece of our collection assessment.”

– Sue Beidler, Snowden Library at Lycoming College
